

# Isaac's Bouncer

Page updated: 23 January 2019 02 July 2018

---

Meet 4-year old Isaac! Isaac has autism and has difficulty sleeping/staying asleep at night; he also gets frustrated and anxious from time-to-time. As a baby Isaac was comforted by the reclined rocking motion of a baby bouncinette but, like many kids he outgrew his baby gear. Isaac's mum contacted Solve directly seeking help in designing and building a larger, custom piece of equipment to help with Isaac's sleeping pattern and provide him with a retreat to calm his frustrations. Thanks to the Solve assessment, design and building services and the generosity of [Plumbtec](#) - Mildura and Perth-based [ROSTA GmbH](#), Isaac now has a custom-built toddler bouncinette, and enjoys up to 11 hours of sleep a night!

---

Do you know someone who could benefit from a custom equipment solution like Isaac's?
