Formerly TADVIC

# About Solve

# How Solve works

Solve Disability Solutions improves the quality of life of people with disabilities and those assisting them, by increasing independence and providing opportunity to pursue their goals at home and in the community.

Solve works with people with disabilities to custom build equipment to enhance independence and participation in the following key areas:

- Everyday Living
- Connecting and Communicating
- Employment
- Sport and Recreation

*Wheelie bin hitch for scooter*

*Bottle tipper to independently pour drinks*

*Camera stand for wheelchair*

Solve combines the skills of Occupational Therapists and technical volunteers to solve equipment problems by modifying or custom building equipment to suit individual requirements.

**Custom Equipment:** Each request is assessed and coordinated by an Occupational Therapist who, with a volunteer, visits the person with a disability at the place where the equipment is to be used. Solve takes a person centred approach; together ideas are discussed and custom modifications and designs are built to meet the person's specific needs.
