

How to add Solve's Assistive Technology services to your NDIS plan

Solve Disability Solutions is a registered NDIS Provider # 405 0000 978

Our unique service provides you with the support and custom assistive technologies you need to achieve your goals, through

- Occupational Therapy assessment
- Technical advice
- Design, construction and modification of equipment when commercial solutions are unavailable.

If you would like Solve services funded through your NDIS plan, you will need to have it included in your plan:

- **Assistive Technology** support (the name of the service provider does not need to be specified in your plan).
- **Capacity Building Daily Activity** to cover therapy oversight by Solve's Occupational Therapists. This is integral to our service to ensure we provide quality, safe and effective solutions that are practical and appropriate. Solve anticipates that approximately 5 hours of Occupational Therapy time will be needed to complete your request from start to finish. Therapy hours may vary, more or less, depending on the complexity of the project.

For more detailed information about how to include Solve's Assistive Technology or Freedom Wheels bicycles into your NDIS plan, download our
